

Study Group Meeting #38

Ian McIntosh, Leonardo MW Ltd.

Compliance with IEEE Standards Policies and Procedures

Subclause 5.2.1 of the *IEEE-SA Standards Board Bylaws* states, "While participating in IEEE standards development activities, all participants...shall act in accordance with all applicable laws (nation-based and international), the IEEE Code of Ethics, and with IEEE Standards policies and procedures."

The contributor acknowledges and accepts that this contribution is subject to

- The IEEE Standards copyright policy as stated in the *IEEE-SA Standards Board Bylaws*, section 7, <http://standards.ieee.org/develop/policies/bylaws/sect6-7.html#7>, and the *IEEE-SA Standards Board Operations Manual*, section 6.1, <http://standards.ieee.org/develop/policies/opman/sect6.html>
- The IEEE Standards patent policy as stated in the *IEEE-SA Standards Board Bylaws*, section 6, <http://standards.ieee.org/guides/bylaws/sect6-7.html#6>, and the *IEEE-SA Standards Board Operations Manual*, section 6.3, <http://standards.ieee.org/develop/policies/opman/sect6.html>

**IEEE [TBD]
System Test Access Management
Ian McIntosh (interim chair)**

Study Group Meeting #38

Date: 2018-06-11

Author(s):

Name	Affiliation	Phone [optional]	Email [optional]
Ian McIntosh	Leonardo MW Ltd.		

Agenda

1. Roll Call
2. IEEE Patent Slides
3. Review and approve previous minutes:
4. Review open action items
5. Discussion Topics:
 - Feedback on PAR Scope, Purpose and Need; Stakeholders; Voting process
6. Key Takeaways from today's meeting
7. Glossary terms from this meeting
8. Topic for next meeting
9. Schedule next meeting
10. Reminders
11. Any other business
12. List new action items
13. Adjourn

Instructions for the WG Chair

The IEEE-SA strongly recommends that at each WG meeting the chair or a designee:

- Show slides #1 through #4 of this presentation
- Advise the WG attendees that:
 - IEEE's patent policy is described in Clause 6 of the *IEEE-SA Standards Board Bylaws*;
 - Early identification of patent claims which may be essential for the use of standards under development is strongly encouraged;
 - There may be Essential Patent Claims of which IEEE is not aware. Additionally, neither IEEE, the WG, nor the WG Chair can ensure the accuracy or completeness of any assurance or whether any such assurance is, in fact, of a Patent Claim that is essential for the use of the standard under development.
- Instruct the WG Secretary to record in the minutes of the relevant WG meeting:
 - That the foregoing information was provided and that slides 1 through 4 (and this slide 0, if applicable) were shown;
 - That the chair or designee provided an opportunity for participants to identify patent claim(s)/patent application claim(s) and/or the holder of patent claim(s)/patent application claim(s) of which the participant is personally aware and that may be essential for the use of that standard
 - Any responses that were given, specifically the patent claim(s)/patent application claim(s) and/or the holder of the patent claim(s)/patent application claim(s) that were identified (if any) and by whom.
- The WG Chair shall ensure that a request is made to any identified holders of potential essential patent claim(s) to complete and submit a Letter of Assurance.
- It is recommended that the WG Chair review the guidance in *IEEE-SA Standards Board Operations Manual* 6.3.5 and in FAQs 14 and 15 on inclusion of potential Essential Patent Claims by incorporation or by reference.

Note: **WG** includes Working Groups, Task Groups, and other standards-developing committees with a PAR approved by the IEEE-SA Standards Board.

Participants have a duty to inform the IEEE

- Participants shall inform the IEEE (or cause the IEEE to be informed) of the identity of each holder of any potential Essential Patent Claims of which they are personally aware if the claims are owned or controlled by the participant or the entity the participant is from, employed by, or otherwise represents
- Participants should inform the IEEE (or cause the IEEE to be informed) of the identity of any other holders of potential Essential Patent Claims

**Early identification of holders of potential
Essential Patent Claims is encouraged**

Ways to inform IEEE

- Cause an LOA to be submitted to the IEEE-SA (patcom@ieee.org); or
- Provide the chair of this group with the identity of the holder(s) of any and all such claims as soon as possible; or
- **Speak up now and respond to this Call for Potentially Essential Patents**

If anyone in this meeting is personally aware of the holder of any patent claims that are potentially essential to implementation of the proposed standard(s) under consideration by this group and that are not already the subject of an Accepted Letter of Assurance, please respond at this time by providing relevant information to the WG Chair

Other guidelines for IEEE WG meetings

- All IEEE-SA standards meetings shall be conducted in compliance with all applicable laws, including antitrust and competition laws.
 - Don't discuss the interpretation, validity, or essentiality of patents/patent claims.
 - Don't discuss specific license rates, terms, or conditions.
 - Relative costs of different technical approaches that include relative costs of patent licensing terms may be discussed in standards development meetings.
 - Technical considerations remain the primary focus
 - Don't discuss or engage in the fixing of product prices, allocation of customers, or division of sales markets.
 - Don't discuss the status or substance of ongoing or threatened litigation.
 - Don't be silent if inappropriate topics are discussed ... do formally object.

For more details, see *IEEE-SA Standards Board Operations Manual*, clause 5.3.10 and *Antitrust and Competition Policy: What You Need to Know* at <http://standards.ieee.org/develop/policies/antitrust.pdf>

Patent-related information

The patent policy and the procedures used to execute that policy are documented in the:

- ***IEEE-SA Standards Board Bylaws***
(<http://standards.ieee.org/develop/policies/bylaws/sect6-7.html#6>)
- ***IEEE-SA Standards Board Operations Manual***
(<http://standards.ieee.org/develop/policies/opman/sect6.html#6.3>)

Material about the patent policy is available at

<http://standards.ieee.org/about/sasb/patcom/materials.html>

**If you have questions, contact the IEEE-SA
Standards Board Patent Committee
Administrator at patcom@ieee.org**

3. Review and approve minutes

Meeting #37, June 4

Updated draft circulated June 7.

Attendees:

Ian McIntosh (Leonardo MW Ltd.) Bill Eklow (Retired) (joined 11:41) Brian Erickson (JTAG Technologies) Peter Horwood (Firecron Ltd.) Bill Huynh (Marvell Inc.) Joel Irby (ARM)	Naveen Srivastava (Nvidia) Jon Stewart (Dell) Brad Van Treuren (Nokia) Russell Shannon (NAVAIR Lakehurst) Louis Ungar (ATE Solutions)
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------

4. Review open action items

Action Item Register:

<http://files.sjtag.org/StudyGroup/ActionItemRegister.xls>

Format of action number is

[Meeting#.Action# within that meeting]

[21.1] Supply Ian with glossary definitions used by 1687.1 for "transformation" and "retargetting".

[27.2] Legacy Initiative Group to propose definition for "SJTAG". No recent contributions:

<http://forums.sjtag.org/viewtopic.php?p=1314#p1314>, ongoing action.

5. Discussion Topics

5.a Feedback on Scope, Purpose and Need.

- Slides 13-15
- See forum posts beginning:
<http://forums.sjtag.org/viewtopic.php?p=1358#p1358>

5.b Identify "Stakeholders".

- We probably only need a list for this?

5.c Voting process, motions

- See slide 16.

Scope

STAM Scope (current proposal):

- This standard: 1) defines a representation of conforming behavioral descriptions of interfaces and transformations, 2) defines **new** methods for utilizing those representations to enhance the test management and access to sub-assembly test assets. This will allow, in conjunction with existing methods, for the coordination and control of a variety of digital interfaces to devices, boards, and sub-systems to extend test access to board and system levels. The standard does not replace or provide an alternative to existing test interface standards, but aims instead to enable their usage throughout the hierarchy of systems.

Scope

STAM Scope (updated proposal):

- This standard: 1) defines a representation of conforming behavioral descriptions of interfaces and transformations, 2) defines **new** methods for utilizing those representations to enhance the test management and access to sub-assembly test assets. In conjunction with existing methods, this will allow for the coordination and control of a variety of digital interfaces to devices, boards, and sub-systems to extend test access to board and system levels. The standard does not replace or provide an alternative to existing test interface standards, but aims instead to enable their usage throughout the hierarchy of systems.

Purpose

STAM Purpose (current proposal, with forum edit):

- The purpose of this standard is to provide a means to seamlessly integrate component access topologies, interface constraints, and other dependencies at the board and system level by using standardized descriptions focusing on topology, interfaces and behavior (as opposed to physical structure). This will ease the burden on those preparing test, maintenance and support applications, including ATPGs, in particular where the application requires to co-ordinate control of and data transfer through multiple interfaces and/or protocols. The providers of these conforming descriptions are the producers of [integrated circuits or printed circuit board assemblies](#) with digital interfaces that are intended to be used in an automated fashion within a larger assembly. This standard will include a methodology to ensure access to particular destination registers in the correct time order.

Purpose

STAM Purpose (updated proposal):

- The purpose of this standard is to provide a means to seamlessly integrate component access topologies, interface constraints, and other dependencies at the board and system level by using standardized descriptions focusing on topology, interfaces and behavior (as opposed to physical structure). This will ease the burden on those preparing test, maintenance and support applications, including Automatic Test Pattern Generators (ATPGs), in particular where the application requires to co-ordinate control of and data transfer through multiple interfaces and/or protocols. Typically, the providers of these conforming descriptions are the producers of [assemblies of integrated circuits, printed circuit boards or sub-systems, including, for example, intellectual property cores in a System on Chip \(SoC\)](#), with digital interfaces that are intended to be used in an automated fashion within a larger assembly. This standard will also include a methodology to ensure access to particular destination registers in the correct time order.

Need

STAM Need (current proposal):

- Standards exist to access diverse feature sets for device level test and instrumentation. However, there is currently no standard that provides for the aggregate management and coordination of such standards for higher level assemblies, such as boards or systems.
- Users of board and system level automated test equipment need to be able to command their tools and instruments, identifying the dependencies, constraints, and required coordination. Embedded applications also need to have access to these same instruments at higher levels during run-time.
- Standardization is needed to facilitate such automation and to enhance testability, test coverage, and diagnostics resolution in the higher level assemblies.

Stakeholders by technology

- Test Developers
- Maintenance and Operations Developers
- IC Manufacturers
- Circuit Board Designers (Hardware Design Engineers)
- Hardware System Architects
- COTS Manufacturers
- Instrument Manufacturers
- ATE Manufacturers
- ECAD Tool Suppliers
- Test Tool Suppliers

Stakeholders by industry

- Aerospace
- Automotive
- Data Services
- Environmental
- Instrument
- Medical
- Telecom
- Test
- And many more...

Voting

- Process:
 - Proposal needs to be moved in order to initiate a vote.
 - Voting by email, invite to be sent out as soon as practical after this meeting, voting to end at the Call to Order on 18th.
 - Eligibility by having attended 3 from last 5 meetings, as measured at either this or next meeting.

- Motions:
 - Motion required to accept each of Scope, Purpose, Need and Stakeholders.
 - e.g. “I move that the group adopts the Scope as presented during this meeting for the STAM PAR”.
 - If we agree, we could do it all-in-one.
 - Small risk that disagreeing on one text would make all fail, but we need them all anyway.

Wrap-up items

6. Today's Key Takeaways

7. Glossary terms from this meeting

8. Topic for next meeting

9. Schedule next meeting
June 18

10. Reminders

We need to submit our Draft PAR to TTSC by the end of June.

Think about potential officers, moving towards a Working Group.

11. Any other business

12. List new action items

13. Adjourn
